

Building infrastructure in order to create economic and social development is a responsible act towards future generations.

JESA is a leader in the design of modern and sustainable infrastructure. The Excellence developed within our teams, the multidisciplinary approach of our engineers and the recognized quality of our experts enable us to deliver the most appropriate and adapted innovative solutions.

Our clients are our valued partners, we assist them in taking the most informed decisions. They rely on the extensive experience and knowledge of our teams. In Morocco, our teams have contributed in providing the Kingdom with one of the most developed roads and highways network in Africa :

- 1- Highways - 1800 km
- 2- Classified Roads – 57 334 km where 13 318 km is paved
- 3- Paved Roads (Outside Cities)
 - a- National Roads – 10 203 km
 - b- Regional Roads – 9 370 km
 - c- Provincial Roads – 23 745 km

Nos Missions

- Master Planning and Feasibility Studies
- Environmental Studies
- Concept, preliminary, and FEED Design
- Intelligent Transportation Systems (ITS)
- Detailed Design & tendering Process
- Technical Assistance & Consulting
- Construction Management & Work Supervision
- Project & Program Management
- Asset Management
- Safety & Security

Transport Infrastructure

- Urban development (underpass, Roundabouts and intersections, interchanges)
- Expressways and Tolled Highways
- Roads (Rehabilitation and widening)

Structures

- Railway (Passenger/Fret and high-speed lines)
- Bridges and structures
- Tunnels and special structures
- Special foundations
- Geotechnical Solutions (stability)

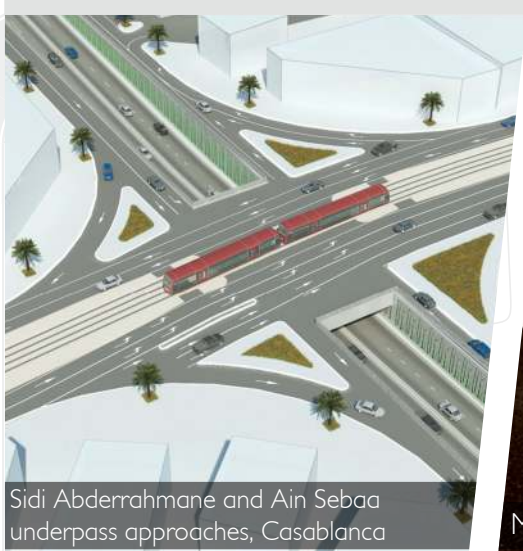

Ports

- Port Engineering Design (general infrastructure)
- Port Infrastructure and development (Sub-structure and Super-structure)
- Maritime works and equipment
- Coast protection and development

INFRASTRUCTURE
& TRANSPORT

JESA

Flagship Projects

Sidi Abderrahmane and Ain Sebaa underpass approaches, Casablanca

Marrakech / Agadir Highway - Engineering

Kenitra - Tangier high-speed Line - North Section
"TOARC 1 and TOARC 2" - Engineering
Rail link between Agadir and Laayoune - Engineering

Sidi Maarouf Cable Stayed Bridge, Casablanca - Engineering

Intersection A and Azbane crossroads, Casablanca - PM
